POWDER COATER JOB DESCRIPTION

The ideal candidate will understand the entire powder coating process meeting industry standards.

Requirements:

- Candidate will have the ability to understand PH balance for water discharge (JEA permit knowledge preferred but not necessary).
- Will have knowledge regarding washing and pre-preparation processes for metals (aluminum) to be powder coated using the appropriate chemicals used in the industry.
- Candidate will have the ability to maintain and diagnose equipment related to the powder coating process.
- Candidate will have the ability to correctly spray powder maintaining industry standards.
- Candidate will have the ability to manage inventory of materials (powder, chemicals, etc.) related to the powder coating area.
- Candidate will help maintain company inventory of powder coated parts.
- Candidate will have the ability to maintain a workflow to maintain the productivity of the powder coating department.

The ideal candidate must be detail oriented, organized and have the ability to work unsupervised and have initiative to make decisions regarding the position. Also candidate must have the ability to train helpers and other shift workers for the area.

Prior experience with other methods of painting/coating (wet painting) are encouraged to apply. Prior experience in other methods of painting/coating a plus.

Salary negotiable and commensurate with experience.
